Independent Auditors' Report

To the Board of Directors and Shareholders of
Prival Securities, Inc.

Report on the audit of the financial statements

Our opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Prival Securities, Inc. (the “Company”) as of June 30, 2024, as well as its financial performance and its cash flows for the year then ended, in accordance with International Financial Reporting Standards.

What we have audited

The financial statements of the Company comprise:

- the statement of financial position as of June 30, 2024;
- the statement of profit or loss and other comprehensive income for the year then ended;
- the statement of changes in equity for the year then ended;
- the statement of cash flows for the year then ended; and
- the notes to the financial statements, which include material accounting policies and other explanatory information.

Bases for the opinion

We have conducted our audit in accordance with International Standards on Auditing. Our responsibilities under those standards are further described in the *auditor's responsibilities for the audit of the financial statements* section of our report.

We consider that the evidence of the audit that we have obtained is enough and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the International Code of Ethics for Professional Accountants (including International Standards of Independence) issued by the International Ethics Standards Board for Accountants (IESBA Code) and the professional ethics code requirements for certified public accountant that are applicable to our audit of the financial statements in the Republic of Panama. We have fulfilled all other ethical responsibilities in accordance with the IESBA Code and the ethical requirements of the Republic of Panama.

To the Board of Directors and Shareholders of
Prival Securities, Inc.
Page 2

Responsibilities of management and those charged with governance of the Company in relation to the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards, and of the internal control that management considers necessary to enable the preparation of financial statements that are free from material misstatement, due to fraud or error.

In preparing the financial statements, management is responsible to evaluate the Company's capacity to continue operations as a going concern, disclosing, as appropriate, issues related to business as a going concern and utilizing the basis for accounting for going concern, unless management has the intention to liquidate the Company or cease operations, given there is no other realistic alternative.

Those responsible for the governance of the Company are responsible for the supervision of the financial information reporting process of the Company.

Auditor's responsibilities in relation to the audit of the financial statements

Our objectives are to obtain reasonable assurance that the financial statements are free from material misstatement, due to fraud or error, and issue an audit report with our opinion. Reasonable assurance is a high degree of assurance, but it does not guarantee that an audit conducted in accordance A reasonable assurance is a high degree of assurance, but it does not guarantee that an audit performed according to International Standards on Auditing will always detect a material error when it exists. Errors may be due to fraud or error and are considered material if, individually or aggregated, may be reasonably expected to influence users' economic decisions that are based on these financial statements.

As part of an audit in accordance with International Standards on Auditing, we apply our professional judgment, and we maintain an attitude of professional skepticism during the whole audit. Also:

- We identify and assess the risks of material misstatement in the financial statements, due to fraud or error, design and perform audit procedures to respond to those risks and obtain sufficient appropriate audit evidence to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- We obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, and not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- We evaluate the appropriateness of the accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

To the Board of Directors and Shareholders of
Prival Securities, Inc.
Page 3

- We conclude about management's appropriate use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Company to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the corresponding disclosures in the financial statements, and if such disclosures are inadequate, we express a modified opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- We evaluate the overall presentation, the structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying events and transactions in a manner that achieves fair presentation.

We communicate with those charged with governance of the Company regarding, among other matters, the planned scope and timing of the audit, as well as significant audit findings, including any significant deficiencies in internal control that we identified during our audit.

Report on other legal and regulatory requirements

In compliance with Law 280 of December 30, 2021, which regulates the profession of the authorized public accountant in the Republic of Panama, we declare the following:

- That the Management, Execution and Supervision of this audit work has been physically carried out in Panamanian territory.
- The audit partner who has prepared this report of the independent auditors is Diana Mosquera, with certified public accountant license No.5160.
- The work team that has participated in the audit referred to in this report is made up of Diana Mosquera, Partner; and Héctor Luna; Manager.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements

June 30, 2024

(En balboas)

1. General Information

Prival Securities, Inc. (the “Company”) was incorporated on October 29, 2009 under the laws of the Republic of Panama. Its main activity is to negotiate, execute and process the purchase and sale of securities, locally and internationally, and manage investment portfolios, among others.

The Superintendency of Securities Market of Panama, through Resolution No.119 of April 19, 2010, authorized the Company to operate as a Brokerage Firm and through Resolution No.342-10 of September 6, 2010, granted it a license to operate as Investment Manager

The Company is 100% subsidiary of Prival Bank, S.A., a Panamanian banking entity with a general license, authorized to operate by the Superintendency of Banks of Panama.

The Company's main offices are located at Santa Maria Business District # 72 Tower 1, Panama City.

The financial statements of the Company for the period ended June 30, 2024, were authorized by the General Manager for issuance on September 26, 2024.

2. Application of International Financial Reporting Standards (IFRSs)

New Amendments Adopted by the Bank

Amendments to IAS 1 Presentation of Financial Statements and Practice Statement 2 of IFRS Accounting Standards – Making Materiality Judgements – Disclosure of Accounting Policies: In February 2021, the IASB issued amendments to IAS 1 Presentation of Financial Statements and Practice Statement 2 of IFRS Accounting Standards to replace the term “significant” with “material” to require entities to disclose material information about their accounting policies, rather than their significant accounting policies. In this way, information about accounting policies can be considered material when considered together with other information in a complete set of financial statements. In the Board’s view, information about accounting policies is expected to be material if its disclosure would be necessary for primary users to understand the information provided about material transactions, other events or conditions in the financial statements.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements

June 30, 2024

(En balboas)

Amendment to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors - Definition of Accounting Estimate: In February 2021, the Board issued amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors to include the definition of accounting estimates in paragraph 5 and to include other amendments to IAS 8 to assist entities in distinguishing changes in accounting estimates from changes in accounting policies.

These modifications had no impact on these financial statements.

New Amendments Not Adopted by the Company

Non-current liabilities with loan agreement covenants - Amendments to IAS 1: The amendments made to IAS 1 Presentation of Financial Statements in 2020 clarified that liabilities are classified as current or non-current, depending on the rights that exist at the end of the reporting period. The classification is not affected by the entity's expectations or events after the reporting date (for example, receipt of an exemption or breach of a covenant). The amendments also clarified what IAS 1 means when it refers to the "settlement" of a liability. The amendments were to be applied from 1 January 2022. However, the effective date was subsequently deferred to 1 January 2023 and then 1 January 2024.

In October 2022, the IASB made further amendments to IAS 1 in response to concerns raised about these changes in the classification of liabilities as current or non-current.

The new amendments clarify that loan agreement covenants will not affect the classification of a liability as current or non-current at the reporting date if the entity is only required to comply with the covenants after the reporting date. However, if the entity is required to comply with a covenant either before or at the reporting date, this will affect the classification as current or non-current, even if the covenant is only tested for compliance after the reporting date.

The amendments require disclosures if an entity classifies a liability as non-current and that liability is subject to covenants that the entity must comply with within 12 months of the reporting date. Disclosures include:

- the carrying amount of the liability,
- information about the covenants, and facts and circumstances, if any, that indicate that the entity may have difficulty complying with the loan covenants.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements

June 30, 2024

(En balboas)

The amendments must be applied retrospectively in accordance with the normal requirements of IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors. Special transitional rules apply if an entity has adopted the 2020 amendments early with respect to the classification of liabilities as current or non-current.

Sale Leaseback Liability - Amendments to IFRS 16: In September 2022, the IASB finalized limited scope amendments to the sale leaseback liability requirements for sale-leaseback transactions in IFRS 16 Leases that explain how an entity accounts for a sale-leaseback after the transaction date. The amendments specify that, in measuring the lease liability following a sale-leaseback, the seller-lessee determines the “lease payments” and “revised lease payments” in a manner that does not result in the seller-lessee recognising any amount of gain or loss that relates to the right-of-use it retains. This could have a particular impact on sale-leaseback transactions where the lease payments include variable payments that do not depend on an index or rate. This amendment is effective from 1 January 2024.

3. Material Accounting Policies

Compliance with IFRS Accounting Standards

The accompanying financial statements have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (IASB) (IFRS Accounting Standards). These financial statements have been prepared under the historical cost convention. IFRS Accounting Standards comprise the following authoritative literature:

- IFRS Accounting Standards.
- IAS Standards.
- Interpretations developed by the IFRS Interpretations Committee (IFRS Interpretations) or its predecessor body, the Standing Interpretations Committee (SIC Interpretations).

Basis of Preparation

The financial statements have been prepared based on historical cost, except for financial assets measured at fair value with changes in other comprehensive income, which are presented at fair value.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements

June 30, 2024

(En balboas)

The fair value is the price that would be received from the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or liability, the Company considers the characteristics of the asset or liability if market participants take into account these characteristics to value the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such basis.

Foreign Currency

Functional and presentation currency

The financial statements are presented in Balboas, the functional and presentation currency of the Company.

The Balboa, monetary unit of the Republic of Panama, is at par and freely exchangeable with the United States Dollar. The Republic of Panama does not issue paper currency and instead uses the US Dollar as legal tender.

Balances and transactions

Transactions in foreign currency are translated into the functional currency applying the prevailing exchange rate at the transaction date. The gain or loss arising from the settlement of such transactions and the year-end conversion of monetary assets and liabilities denominated in foreign currency are recognized in profit or loss, except when they are deferred in equity for qualifying as a cash flow hedge.

Financial Assets

Classification

In accordance with IFRS 9, the Company classifies its financial assets and liabilities at the time of initial recognition in the categories of financial assets and financial liabilities discussed below.

When applying that classification, a financial asset or liability is considered to be held for trading if:

- It has been acquired principally for the purpose of selling or repurchasing it in the near-term, or

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements

June 30, 2024

(En balboas)

- On the initial recognition, it is part of a portfolio of identified financial instruments that are jointly managed and for which there is evidence of a recent actual pattern of short-term profit-taking, or
- It is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

Financial Assets

The Company classifies its financial assets as subsequently measured at fair value through other comprehensive income based on:

- The entity's business model for managing the financial assets.
- The contractual cash flows characteristics of the financial asset.

Financial Assets Measured at Fair Value through other Comprehensive Income (FVTOCI)

A debt instrument is measured at FVTOCI if it meets both of the following conditions and has not been designated as FVTPL:

- The asset is held within a business model whose objective is to collect contractual cash flows and to sell these financial assets, and;
- The contractual terms of the financial asset establish specific dates for cash flows derived solely from payments of principal and interest on the current balance.

Financial Liabilities

Financial liabilities

Financial liabilities are classified as other financial liabilities.

Other financial liabilities

Other financial liabilities are initially measured at fair value, net of transaction costs, and subsequently measured at amortized cost using the effective interest rate method, with interest expenses recognized on an effective interest rate basis.

Derecognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the obligations of the Company are settled, canceled or expired.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements

June 30, 2024

(En balboas)

Offsetting of Financial Instruments

Financial assets and liabilities are offset, that is, when the net amount is presented in the statement of financial position, only when the dependent entities have the right, legally, to offset the recognized amounts in the mentioned instruments, as well as the intention to liquidate the net amount, or to realize the asset and pay the liability simultaneously.

Interest Income and Expenses

Interest income and expenses are recognized in the statement of profit or loss and other comprehensive income for all financial instruments that generate interest using the effective interest rate method.

The effective interest rate method is used to calculate the amortized cost of a financial asset or liability and for allocating interest income or expenses over a period of time. The effective interest rate is the rate that accurately discounts estimated cash flows over the estimated life of a financial instrument, or, when appropriate over a shorter period, at its net carrying amount.

When calculating the effective interest rate, cash flows are estimated considering the contractual terms of the financial instrument; however, future credit losses are not considered.

The calculation of the effective interest rate includes transaction costs and fees paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs directly attributable to the acquisition or issuance of a financial asset or a financial liability.

Dividend Income

Dividend income is recognized once the Company's rights to receive this payment have been established, usually being at the previous dividend date. Dividend income is recognized gross of tax withholdings, if any.

Commission Income and Expenses

Commission fees, income and expenses that are an integral part of the effective interest rate of a financial asset or liability are included in the measurement of the effective interest rate.

Other income and expenses from fees and commissions are mainly related to fees from transactions and services, which are recorded as income and expenses to the extent that the services are provided or received. On the other hand, income from brokerage services and issuance structuring corresponds to the commissions received for the purchase and sale of securities on behalf of clients and debt structuring, which are recognized as income at the settlement date.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements

June 30, 2024

(En balboas)

Goodwill

Goodwill arising from a business acquisition is carried at the cost established at the acquisition date of the business less any impairment loss, if any.

Goodwill is reviewed annually to determine if there are any indications of impairment of its carrying amount. If such indications exist, the difference between the carrying amount of the goodwill and the recoverable amount is recognized against the results of the period. Goodwill is allocated to cash-generating units for impairment assessment purposes. Any impairment loss is recognized in profit or loss. An impairment loss recognized in goodwill is not reversed in subsequent periods.

Intangible Assets

Software licenses are stated at cost less accumulated amortization. Amortization is calculated on the cost of the license based on the straight-line method over the estimated useful life of three years.

Impairment of non-financial Assets

At each date of the statement of financial position, the Company reviews the carrying amounts of its non-financial assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). In case the asset does not generate cash flows for itself, that is independent of other assets, the Company calculates the recoverable amount of the cash-generating unit to which the asset belongs. Intangible assets with indefinite useful lives are tested for impairment annually.

The recoverable amount is the higher of fair value, less costs of sale and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate before tax that reflects current market assessments with respect to the time value of money and the specific risks of the asset for which estimated future cash flows have not been adjusted.

If it is estimated that the recoverable amount of an asset (or cash-generating unit) is less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount. An impairment loss is immediately recognized as an expense.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements

June 30, 2024

(En balboas)

When an impairment loss is subsequently reversed, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount. This reversal is done in such a way that the increased carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had been recognized for the asset (cash-generating unit) in prior years. The reversal of an impairment loss is immediately recognized as income.

Income Tax

The annual income tax includes both current tax and deferred tax. Income tax is recognized in results from operations for the year. The current income tax refers to the estimated tax payable on taxable income for the period, using the prevailing rate at the date of the statement of financial position.

Cash Equivalents

Bank deposits are presented at cost in the statement of financial position. For purposes of the statement of cash flows, total cash consists of the Company's demand deposits.

4. Financial Risk Management

Objectives of Financial Risks Management

The activities of the Company are exposed to a variety of financial risks and those activities include the analysis, evaluation, acceptance and management of a certain degree of risk or combination of risks. Taking risks is inherent to the financial business, and the operational risks are an inevitable consequence of being in business. Therefore, the objective of the Company is to achieve an appropriate balance between risk and return and minimize the potential adverse effects on the financial returns of the Company.

The activities of the Company are mainly related to the use of financial instruments, and, as such, the statement of financial position is mainly composed of financial instruments. The Company is therefore exposed to the following risks:

- Credit risk
- Liquidity risk
- Market risk
- Operational risk

The Board of Directors of the Company has the responsibility to establish and overlook the policies on financial instruments risk management.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements

June 30, 2024

(En balboas)

The Company is subject to the regulations of the Superintendency of Securities Market of Panama in terms of risk, liquidity, and capitalization concentrations, among others.

The main risks identified by the Company are credit, liquidity and market risk, which are described below:

Credit Risk

It is the risk of losses due to the counterparty not paying on time and all its obligations or that the counterparty with whom it negotiates breaches a contractual obligation before settling a contract and the effect of having to replace the transaction to balance the position.

The financial assets that potentially present credit risk for the Company consist essentially of bank deposits that earn interests. Bank deposits are placed with local banks. The risk rating of the FVTOCI would be BBB according to the S&P rating agency.

Liquidity Risk

Liquidity risk is the risk that the Company does not meet all its obligations on time. The Company holds short-term obligations; however, its liquid assets are higher and provide the coverage necessary to meet its obligations.

The liquidity risk's management process as carried out by the Company includes:

- Managing and monitoring future cash flows to ensure that requirements can be met (this includes the repositioning of funds as they mature);
- Monitoring liquidity rate against internal and regulatory requirements; and
- Managing the maturity profiles of financial liabilities.

The monitoring and reporting, prepared by Management, become tools for measuring and cash flow projection for the next day, week and month respectively, as these are key periods for liquidity management.

The key measurement used by the Company for the administration of liquidity risk is ratio of liquid assets on liquid liabilities. The liquidity risk is defined as the inability of the Company to meet all its obligations due to, among others, the decrease in the value of investments, excessive concentration of liabilities with a particular source, the mismatch between assets and liabilities, the lack of liquidity of the assets, or the financing of long-term assets with short-term liabilities.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements

June 30, 2024

(En balboas)

Risk management policies establish liquidity limits that determine the portion of assets that the Company must maintain in highly liquid instruments and deadlines.

Market Risk

Market risk is the risk that the value of a financial asset will decrease due to changes in interest rates, in foreign currency exchange rates, in stock prices, and other financial variables, as well as the reaction of market participants to economic and political events.

Currently, the Company measures its market risk using internal factors and according to internal investment policies, considering that they should be properly approved by the Board of Directors, who determine the risks factors according to the positions of the Company inside the market. In addition, reports are made to the Board of Directors on investments, thus allowing better decision-making thereon.

The market risk to which the Company is exposed is mainly related to the interest rate risk.

Operational risk Management

Operational risk is defined as the possibility of incurring in losses due to deficiencies, errors or inadequacies of the personnel, the processes, technology, and infrastructure or due to the occurrence of external events. This definition includes the legal risk associated with such factors.

Capital Management

The Company manages its capital to assure:

- Compliance with requirements established by the Panama Stock Exchange and by the Superintendency of Securities Market of Panama.
- Maintaining a capital base, sufficiently strong to support its business performance.
- Continuing as a going concern while shareholders' returns are maximized through the optimization of the debt and capital balances.

Fair Value of Financial Instruments

The estimated fair value is the amount by which financial instruments can be traded in a common transaction between interested parties, under conditions other than a forced sale or settlement and is best evidenced by market quotations, if any.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements

June 30, 2024

(En balboas)

The fair value estimates are made at a specific date, based on market estimates and information on financial instruments. These estimates do not reflect any premium or discount that could result from a particular financial instrument sale offering at a given date. These estimates are subjective in nature, involve uncertainties and matters of significant judgment and, therefore, cannot be determined accurately. Any changes in assumptions could affect estimates significantly.

Fair value hierarchy

IFRS 13 sets a hierarchy level of the valuation techniques based on the transparency of the variables used in determining the fair value. All financial instruments at fair value are categorized in one of the three levels of hierarchy:

- Level 1 - Inputs that are quoted market prices (unadjusted) in active markets for assets or liabilities identical to those the entity can access at the measurement date.
- Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, or similar in markets that are not active.
- Level 3 - Inputs that are unobservable for the asset or liability.

When determining the fair value measurements of assets and liabilities that are required or permitted to be recorded at fair value, the Company considers the main market or the best market in which the transaction could take place and considers the assumptions that a participant of the market would use to value the asset or liability. When possible, the Company uses active markets and observable market prices for identical assets and liabilities.

When identical assets and liabilities are not traded in active markets, the Company uses observable market data for similar assets and liabilities. However, certain assets and liabilities are not actively traded in observable markets and the Company must use alternative valuation techniques to determine the fair value measurement. The frequency of transactions, the size differential between supply and demand and the size of the investment are factors considered to determine the liquidity of markets and the relevance of observed prices in these markets.

Fair value of investments at FVTOCI is based on quoted market prices when available or, if they are not available, based on discounted expected cash flows using market rates commensurate with the credit quality and maturity of the investment.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements

June 30, 2024

(En balboas)

When the reference prices are available in an active market, investments at FVTOCI are classified within Level 1 of the fair value hierarchy. If the prices of market value are not available or available in markets that are not active, fair value is estimated based on the quoted prices of similar instruments, or where these are not available, internal valuation techniques are used primarily discounted cash flow models. Such securities are classified within Level 2 of the fair value hierarchy.

Some of the assets and liabilities of the Company are valued at fair value at the end of each year.

Financial assets measured at fair value

Some of the Company's financial assets are measured at fair value at the end of each year. The following table provides information on how the fair values of financial assets are determined (particularly, the valuation technique and inputs used).

Fair value measurement of financial assets FVTOCI

	2024	Level 1	Level 2	Level 3
Shares listed in a local organized market	93,123	-	93,123	-

2023	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>	<u>Carrying value</u>
Financial assets:					
Demand deposits	-	5,128,534	-	5,128,534	5,128,534
Time deposits	-	14,960,606	-	14,960,606	15,033,904
Total financial assets	-	20,089,140	-	20,089,140	20,162,438

Assumptions used in determining the fair value of assets and liabilities

Below is a summary of the assumptions used in the fair value estimates of the most important financial instruments of the Company:

Short-term financial assets

For financial assets with short-term maturities (less than three months), the carrying amount, net of impairment, is an approximation of its fair value. Such instruments include: bank demand deposits.

Goodwill

The following table summarizes the Company's goodwill balance, generated by the acquisition of:

<u>Company</u>	<u>Acquisition date</u>	<u>Acquired participation</u>	<u>Balance</u>
Prival Securities, Inc.	August 12, 2010	100%	3,383,126

In order to test goodwill impairment, Prival Securities carries out an annual valuation of the various businesses acquired and which have generated such gains. The calculation of the valuation of goodwill was determined based on the estimated growth projection, using the discounted cash flow method based on financial budgets approved by the Board of Directors, covering a period of 5 years at a discount rate of 10%.

Management makes the valuation of goodwill in the subsidiary acquired, applying the method of discounted future cash flows, based on the profitability of its operations.

To carry out the valuation of the assets and acquired businesses, the expected cash flows from the businesses are projected for the corresponding cash-generating unit in 5 year periods. Similarly, a growth to perpetuity or multiple cash flows are defined at the end of the period of the projection of cash flows to estimate the terminal cash flow.

The growth rate was placed at 10%. To determine the growth rates of the businesses, growth, performance and historical metrics, their future prospects, as well as business plans were used as a reference. A price to carrying value multiple of 1.48 is incorporated with comparable from the United States and Mexico.

	<u>739,457</u>	<u>905,770</u>

16. Impairment of Investments in Associates

The Company recorded an impairment in investments in associated companies due to the dissolution of Prival Multi Strategy Income and Growth Fund, S.A. for B/.25,000.

17. Income Tax Expense

Income tax returns of the companies incorporated in the Republic of Panama for the last three years are subject to review by the local tax authorities, including the year ended June 30, 2024, according to current tax regulations.

According to current Panamanian tax Legislation, companies are exempt from payment of income tax on profits derived from foreign operations, interest earned on time deposits placed in local banks, interest earned on Panamanian Government securities and investments on securities issued through the Panama Stock Exchange.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements**June 30, 2024***(En balboas)*

Current income tax expense is as follows:

	2024	2023
Current income tax expense	<u>658,642</u>	<u>900,030</u>

As of January 1, 2010, with the entry into force of Law No. 8 of March 15, 2010, Article 699 of the Tax Code states that legal entities whose annual taxable income exceed one million five hundred thousand balboas (B/.1,500,000) must pay income tax at a rate of 25% over the higher of: (1) net taxable income calculated by the traditional method established in Title I of the Fourth Book of the Tax Code, or (2) net taxable income arising from applying four point sixty-seven percent (4.67%) to total taxable income.

As at June 30, 2024, the income tax expense amounts to B/.658,642 (2023: B/.900,030), calculated by the traditional method as follows:

	2024	2023
Profit before income tax	5,530,769	5,911,372
Less: tax effect of non-taxable income	(4,234,617)	(3,486,405)
Plus: tax effect of non-deductible expenses	<u>1,338,417</u>	<u>1,175,154</u>
Taxable base	<u>2,634,569</u>	<u>3,600,121</u>
Income tax	<u>658,642</u>	<u>900,030</u>

18. Assets Under Management and Custody

The Company managed investment portfolio on behalf of and at the risk of the customers amounting to B/.3,324,665,845 (2023: B/.2,659,574,179). Considering the nature of these services, Management considers there is no risk for the Company.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements

June 30, 2024

(En balboas)

19. Main Applicable Laws and Regulations

Securities Law in Panama

The stock market in the Republic of Panama is regulated by Decree Law No. 1 of July 8, 1999, which has been amended by Law No. 67 of September 1, 2011 that establishes the coordination and inter-institutional cooperation system between the entities of financial inspection and creates the Superintendency of the Securities Market of Panama.

Compliance with the Regulatory Entity

On September 18, 2013, the Superintendency of the Securities Market of Panama issued Agreement 8-2013, by which certain provisions of Agreement 4-2011 of June 27, 2011 were modified on the capital adequacy, solvency ratio, capital fund, liquidity ratio and risk concentrations that securities houses should address, regulated by the Superintendency of the Securities Market of Panama.

Capital adequacy

Below is a description on the rules amended in Agreement No.8-2013 of the Superintendency of Securities Market of Panama and the ratios for each of these provisions:

- Total minimum capital required: Brokerage firms will have to constitute and maintain a total minimum capital of B/.350,000 free of taxes, at all times.
- Additional capital request: Article 4-A of Agreement 8-2013 establishes that all brokerage firms offering management services for custody accounts, physically or through a third party, will have to comply with the requirement provided in said agreement. As at March 31, 2024, the Company maintains the minimum required capital.
- Capital adequacy ratio: Brokerage firms must maintain at all times a minimum capital adequacy ratio of eight per cent (8%) of the totality of its assets and off-balance operations weighted in relation to their risks. Those clients' accounts are not included within the calculation of the capital adequacy ratio or of third parties who must be duly separated from the equity of the brokerage firm.
- Liquidity ratio: It is needed to maintain a volume of low-risk investments at all times and highly liquid assets that will be, at least, thirty per cent (30%) of the totality of its expected liabilities with a residual term lower than one year.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)

Notes to the Financial Statements

June 30, 2024

(En balboas)

- Credit risk concentrations: the risks sustained by a brokerage firm regarding an issuer, individual client or a group of issuers or clients related among themselves, will be considered as a concentration situation when the accrued value of these risks exceeds ten per cent (10%) of the entire value of its equity funds.

Due to the nature of the transactions and services rendered by the Company, Management believes there are no risks of credit risk concentration.

As established by the regulatory scheme, capital requirements are measured as follows:

	At year-end	Minimum for the year		Maximum for the year	
	Value	Value	Date	Value	Date
2024					
Capital funds	4,051,908	1,537,681	May, 15	59,428.58	April, 11
Liquidity ratio	366.57%	144.19%	April, 26	588.45%	June, 26
Solvency ratio	1005.40%	258.19%	May, 15	1076.95%	June, 26
	At year-end	Minimum for the year		Maximum for the year	
	Value	Value	Date	Value	Date
2023					
Capital funds	5,518,135	4,779,066	April, 21	19,275,446	July, 14
Liquidity ratio	399.73%	45.89%	January, 30	2863.12%	April, 3
Solvency ratio	162.59%	91.63%	December, 29	895.82%	July, 14

- Capital Funds: Capital funds will consist of the sum of the primary and secondary capital. The primary capital consists of the sum of paid-in and subscribed capital, capital reserves declared, the first placement of shares and (net) accumulated earnings and from which are deducted net and ongoing loss carryforwards, intangible and deferred assets, property, plant and equipment (net of depreciation), the adjusted cost of capital investments, financings granted to third parties, accounts receivable to partners or shareholders and related companies, as well as assets classified as “other assets” within the balance sheet. The secondary capital shall consist of subordinated financings provided they do not exceed fifty percent (50%) of the value of primary capital, financings of undetermined duration, and bonds mandatorily converted into shares.

Prival Securities, Inc.

(A wholly-owned subsidiary of Prival Bank, S.A.)
